FIG. 13 is a schematic diagram of a system 300 for processing a material 200. The system 300 includes a material 200, a processing unit 32, and a collection unit 30. The material 200 is a strip of material with a series of rectangular openings 212. The processing unit 32 is a series of rectangular openings 214. The collection unit 30 is a series of rectangular openings 216. The material 200 is fed into the processing unit 32, and the processed material 30 is collected in the collection unit 30. The system 300 is used for processing a material 200.
